AMIT KUMAR RAY

Full Stack Developer

Phone: +91 9508121381 • Email: amitkumarpatel7562@gmail.com • Location: Bhopal, MP, India
Portfolio: developer-portfolio-dusky-one.vercel.app • GitHub: github.com/amitbuilds18 • LinkedIn: linkedin.com/in/amit-kumar-ray

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience engineering scalable web applications using **React 19, TypeScript, Node.js, Express, and PostgreSQL (Neon)**. Experienced in designing ACID-compliant database architectures (row-level locking), building low-latency conversational AI voice pipelines, and crafting responsive, accessible user interfaces. Proven ability to optimize database query performance by 40% and implement secure authentication (JWT/RBAC).

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend:	React.js (v18/19), Tailwind CSS, Redux Toolkit, React Router, Vite, Chart.js, Recharts
Backend & AI:	Node.js, Express.js, RESTful APIs, JWT Auth, bcrypt, Vapi AI (Voice Streams), Google Gemini AI
Databases:	PostgreSQL (Neon Cloud), MongoDB, ACID Transactions, Row-Level Locking (FOR UPDATE), Indexing
DevOps & Tools:	Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, VS Code, Vercel

FEATURED PROJECTS

Navapay — Full-Stack Fintech Banking & Payment Platform

Live Demo ↗ • GitHub ↗

React 19 | Node.js | Express | PostgreSQL (Neon) | Tailwind CSS | JWT | Gemini AI | Stripe

- Architected a high-concurrency fintech banking platform processing 15+ transaction types including P2P transfers, automated round-up savings, and virtual cards.
- Programmed ACID-compliant transactions with **PostgreSQL row-level locks (FOR UPDATE)**, eliminating race conditions during concurrent fund deductions.
- Hardened security using **JWT in HTTP-only cookies** and a 4-digit MPIN hashed with **bcrypt (10 rounds)** for transfer verification.
- Integrated QR scan-to-pay (<200ms decode latency) and **Google Gemini AI** for automated spending classification and personalized financial insights.

AiInterviewTaker — Real-Time Conversational AI Voice Interview Platform

Live Demo ↗ • GitHub ↗

React 19 | TypeScript | Node.js | Vapi AI (Voice Streaming) | Tailwind CSS | RESTful APIs

- Engineered a conversational AI voice interview platform utilizing **Vapi AI audio streaming**, achieving sub-250ms voice latency during live technical assessments.
- Developed an automated evaluation pipeline using LLMs to score technical responses, communication clarity, and problem-solving metrics in real time.
- Built an interactive candidate feedback dashboard in **React 19** featuring performance scorecards, radar charts, and downloadable assessment reports.
- Enforced strict end-to-end **TypeScript type-safety** across WebRTC audio client payloads, REST API endpoints, and evaluation schemas.

Unified Travel & Multi-Company Career Ecosystem

Live Demo ↗ • GitHub ↗

React.js | Node.js | Express.js | PostgreSQL | MongoDB | Docker | RBAC | Tailwind CSS

- Developed a multi-tenant enterprise portal managing travel logistics and recruitment workflows across 4 corporate divisions with 500+ employee records.
- Implemented a robust 3-tier **Role-Based Access Control (RBAC)** model (Admin, Recruiter, Employee) with isolated tenant data boundaries.
- Optimized 12+ RESTful API endpoints with compound indexing and cursor pagination, reducing query latency by **38% (from 240ms down to 150ms)**.
- Containerized client and server microservices using **Docker Compose**, ensuring 99.9% environment parity across development and production.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2023 – 2027

Sagar Institute of Science, Technology & Research (SISTec-R) — Bhopal, MP | **CGPA: 7.0 / 10.0**

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering.
