AMIT KUMAR RAY

Full Stack Developer (MERN / PERN)

Phone: +91 9508121381 • Email: amitkumarpatel7562@gmail.com • Location: Bhopal, MP, India
GitHub: github.com/amitbuilds18 • LinkedIn: linkedin.com/in/amit-kumar-ray

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience engineering scalable web applications using **React.js, TypeScript, Node.js, Express.js, and PostgreSQL / MongoDB**. Skilled in designing secure RESTful APIs, implementing robust authentication flows (JWT/RBAC), and building responsive, accessible UI components. Strong focus on clean architecture, database query optimization, and delivering production-ready features.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend:	React.js (v18/19), Tailwind CSS, Redux Toolkit, React Router, Vite, Chart.js
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication, CORS, Middleware
Databases:	PostgreSQL (Neon Serverless), MongoDB (Mongoose), Schema Modeling, ACID Transactions
Tools & Practices:	Git, GitHub, Postman, VS Code, npm, Agile Development, Responsive Web Design

FEATURED PROJECTS

DroneTV – Full Stack AI Support & Lead Management Platform [GitHub]

React 19 | TypeScript | Node.js | Express.js | Neon PostgreSQL | Tailwind CSS v4 | Vite

- Architected a full-stack platform for a commercial drone academy and industrial aerial solutions provider featuring course catalogs, flight logs, and service enquiry workflows.
- Built an interactive, rule-based **AI customer support assistant** with keyword intent matching, quick-suggestion chips, and seamless in-chat lead capture dialogs.
- Engineered an administrative CRM dashboard backed by **Neon Serverless PostgreSQL** with real-time lead status updates, multi-column search/filtering, and CSV export.
- Implemented a resilient offline fallback mechanism via **browser localStorage**, guaranteeing zero lead data loss if the backend server experiences intermittent connection issues.

NovaPay – Personal Banking & Financial Management App [GitHub]

React.js | Node.js | Express.js | PostgreSQL | Tailwind CSS | JWT | Chart.js

- Engineered a full-stack fintech banking portal supporting peer-to-peer transfers, virtual card generation, wallet top-ups, and budget tracking.
- Implemented robust authentication using **JWT in HTTP-only cookies** and **bcrypt** password hashing with protected route wrappers.
- Designed dynamic financial analytics dashboards using **Chart.js**, aggregating monthly spending trends, category breakdowns, and financial health scores.
- Structured normalized relational schemas in **PostgreSQL** ensuring ACID-compliant transaction records and zero state discrepancies during fund transfers.

E-Commerce – Online Shopping & Inventory Application [GitHub]

React.js | TypeScript | Node.js | Express.js | PostgreSQL | Tailwind CSS | Redux Toolkit

- Developed an end-to-end shopping web application featuring multi-parameter category filtering, search suggestions, detailed product views, and persistent carts.
- Integrated **Redux Toolkit** for predictable global state management across shopping cart, user authentication status, and wishlist operations.
- Built modular RESTful API endpoints in **Express.js** with input validation, error-handling middlewares, and secure user order histories.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering 2021 – 2025

Sagar Group of Institutions (SIRT) — Bhopal, Madhya Pradesh | **CGPA: 7.0 / 10.0**

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java/C++), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering.
